

Brainstorming:

The Users: id, email, password, name, recipes, public/private, make groups

The Recipes: id, ingredients, instructions, rating, time to make, comments

Ingredients: add to grocery list, what recipes use it

Tables:

```
Create table users (  
  User_id serial primary key,  
  Username varchar(30),  
  Password text,  
  Email varchar(50)  
);
```

```
Create table recipes (  
  Recipe_id serial primary key,  
  User_id integer references users(user_id),  
  Rating integer,  
  Instructions varchar(255),
```

```
Ingredients varchar(255)  
);
```

```
Create table ingredients (  
  Ingredient_id serial primary key,  
  Description varchar(100)  
);
```
